

Hi, I'm Dr Leigh, a veterinarian with over 18 years experience and the owner of Your Vet Online, Australia's only 24/7 telehealth service for animal owners.

I started Your Vet Online because I'm dedicated to providing pet and horse owners with access to evidence-based medicine. I'm continually horrified by the lack of credible information out on the WWW and this is my chance to ensure pets and horses don't succumb to poor welfare choices.

With my easy-going, down to earth practical manner Your Vet Online provides honest, trusty worthy animal health advice.
